What is ClearSight™?

ClearSight™ is an all-inclusive worldwide asset tracking solution that provides real-time positioning and specialized reporting based upon rich data sources from tracking hardware, combined with intelligent sensors. Multiple assets can be viewed from a single portal, which is easily customizable. ClearSight™ can be accessed remotely and securely through any device with internet access.

- Unified Tracking Solution
- Unlimited Assets
- Unlimited User Accounts
- Multilingual Support
- Workflow Management
- Custom Map Support
- Managed Secure Hosting
- White Label Options

Global Reach

Satellite
Satellites can provide a truly global reach to enable the location of assets anywhere in the world - covering land and sea from pole to pole. These communication networks are compatible with terrestrial networks, providing visibility of assets in areas where GSM coverage is not available. Covering land and sea from pole to pole, satellites can provide a truly global reach.

GSM
Cellular coverage is the most preferred tracking solution when operating in populated areas. In areas where GSM is not available, satellite communication will be available to you.

Hybrid solutions
ClearSight™ offers customizable solutions for full visibility of assets, anywhere in the world through multiple coverage options to meet customer needs, as well as, their budgets.
Customization of the ClearSight™ platform can be easily achieved through our white labeling services. Logos, corporate colors, headers, banners and other customizable materials can be implemented throughout the interface to ensure a company’s branding is consistent as customers are re-directed to the tracking platform.

Making ClearSight™ your own will diversify your product portfolio and allow your company to move into new markets, while Thales SATCOM Solutions handles the technical aspects of upgrades, research and development.
